

Hawkers Coin Counter

Wholesalers Stores experience coin and change problems when Hawkers purchase goods in bulk. Hawkers tend to pay for goods using coins only.

This uses up a lot of time at the till when the teller has to count Thousands of Rands in coins.

The **Solution** from **Accpick**

1. Once the Hawker is at the till and displays a bag of counts for payment.
2. The teller invoice him for the goods, the teller then issues him with a document and places the sale on hold.
3. The teller is now free to serve the next customer see the Denson video
4. The Hawker goes to a room where the coins are weighed and counted
5. A receipt is given for the money
6. Hawker returns to the till and gets change if any and a slip is printed for the sale and he leaves the store
